

Individual Retrospective:

This is an individual (one-page) write-up of your contribution to the project. Please describe your contribution, technical or team-related challenges you faced, and ways you overcame those challenges.

Team Member's Effort:

Please provide a brief evaluation of your team mates. This should simply include each person's name and whether their performance was:

Excellent: Made a major contribution to the project

Acceptable: Made an acceptable contribution to the project

Below expectations: Failed to contribute their fair share of effort to the project.

This will be kept confidential. I also will look at github commits, class participation, and other means of evaluating individual effort.
